About MDBA Basin of Knowledge

What is the Basin of Knowledge?

The Murray-Darling Basin Authority (MDBA) Basin of Knowledge (MD BoK) is an online data catalogue designed to support staff in improving the collation of MDBA's important datasets as well as decision making capabilities.

This environment builds upon the widely adopted, open-source data management system [CKAN](#).

What is its scope?

This platform currently caters for the following teams:

1. Basin Plan Evaluation (BPE)
2. Floodplain Processes Body of Knowledge (FP-BoK)
3. Water Environment Research Program (WERP)

As the platform becomes more widely adopted, its scope will increase accordingly.

If you would like to contribute to this data catalogue, please email dataservices@mdba.gov.au in the first instance.
